Test your knowledge on data credibility

Total points 3

1. Which of the following are usually good data sources? Select all that apply.

1 / 1 point

☒ Academic papers

✔ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

☒ Vetted public datasets

✔ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

☐ Social media sites

☒ Governmental agency data

✔ **Correct**

Vetted public datasets, academic papers, and governmental agency data are usually good data sources.

2. To determine if a data source is cited, you should ask which of the following questions? Select all that apply.

1 / 1 point

☐ Is the data relevant to the problem I'm trying to solve?

☐ Has this dataset been properly cleaned?

☒ Who created this dataset?

✔ **Correct**

"Is this dataset from a credible organization?" and "Who created this dataset?" are questions that can help you determine if a data source is cited.

☒ Is this dataset from a credible organization?

✔ **Correct**

"Is this dataset from a credible organization?" and "Who created this dataset?" are questions that can help you determine if a data source is cited.

3. A data analyst is analyzing sales data for the newest version of a product. They use third-party data about an older version of the product. For what reasons is this inappropriate for their analysis? Select all that apply.

1 / 1 point

- ☐ The data is biased
- ☒ The data is not original

Third-party data about an older version of the product is inappropriate because it is not original or current.

- ☒ The data is not current

Third-party data about an older version of the product is inappropriate because it is not original or current.

- ☐ The data is not accurate
