## Test your knowledge on documenting the cleaning process

While cleaning data, documentation is used to track changes, deletions, and errors.

Tot	al points 3	
1.	Why is it important for a data analyst to document the evolution of a dataset? Select all that apply.	1/1 point
	To inform other users of changes	
	Correct It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.	
	To determine the quality of the data	
	Correct It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.	
	✓ To recover data-cleaning errors	
	Correct It is important to document the evolution of a dataset in order to recover data-cleaning errors, inform other users of changes, and determine the quality of the data.	
	☐ To identify best practices in the collection of data	
2.	Fill in the blank: While cleaning data, documentation is used to track Select all that apply.	1/1 point
	✓ changes	
	<ul> <li>Correct</li> <li>While cleaning data, documentation is used to track changes, deletions, and errors.</li> </ul>	
	bias	
	✓ deletions	

Documenting data-cleaning makes it possible to be transparent about your process, keep team members on the same

page, and demonstrate to project stakeholders that you are accountable.

Keep team members on the same page
